

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A group interaction method comprising the steps of:
randomly selecting a plurality of indicia not comprising merely a single letter;
requiring a first set of one or more persons to generate one or more texts in writing, each comprising at least one sentence, containing words corresponding to the plurality of indicia;
and
having a second set of one or more other persons record in writing one or more words that they believe one or more of the first set of one or more persons is likely to use in one or more of the texts.

Claim 2 (original): The method of claim 1 additionally comprising the step of randomly selecting a scenario within which the one or more texts must fall.

Claim 3 (original): The method of claim 2 wherein the step of randomly selecting a scenario comprises randomly selecting a scenario card from a plurality of scenario cards.

Claim 4 (original): The method of claim 1 wherein the step of randomly selecting a plurality of indicia comprises employing a concentric-ring apparatus with a plurality of rings bearing indicia.

Claim 5 (previously presented): The method of claim 1 wherein the step of randomly selecting a plurality of indicia comprises employing a set of devices bearing indicia.

Claim 6 (original): The method of claim 1 wherein the indicia comprise words.

Claim 7 (currently amended): The method of claim 1 wherein the having step comprises having a second set of one or more other persons record in writing one or more words that one or more of the first set is likely to use in one or more of the texts, except that the one or more words may not contain any of a predetermined list of words.
